Real Time
Networks

Introduction

AssetTracer is modular, smart locker system that offers secure storage and management of evidence in law enforcement settings. It automatically documents a full audit trail of who, what and when evidence was deposited or withdrawn from the locker and provides real time reporting and customizable alerts to meet the needs of any evidence handling procedures.

AssetTracer Secure Evidence Management systems help you:

- Store evidence securely
- Deny access to unauthorized users
- Maintain an auditable chain-of-custody record with optional photo identification
- Collect notes, descriptions, or case numbers upon deposit
- Reduce liability and risk

Improved Availability and Security

- Authorized officers and technicians can securely deposit and withdraw evidence when needed, at any time day or night
- Multiple levels of access and role-based controls
- Refrigerated compartments can store temperature-sensitive evidence

Improved Accountability

- Automated transaction logging provides a full audit trail and detailed chain-of-custody reporting
- RFID content surveillance technology tells you when any item has been withdrawn or returned
- Integrated camera can log user photos in the transaction log for added accountability and security

Complete Management

- Control access to individual locker compartments based on identity or time of day
- Role-based access control features in management software
- Real time reports and automated alerts notify when new evidence is deposited and/or withdrawn
- Remote monitoring of multiple locations from a central location

Rugged Design for Busy Locations

- Durable lockers built with 18-gauge steel frame and panels
- Compact modular design gives you high-density storage when floor space is tight
- Flexible compartment sizes and optional asset tagging
- Emergency opening feature

How It Works

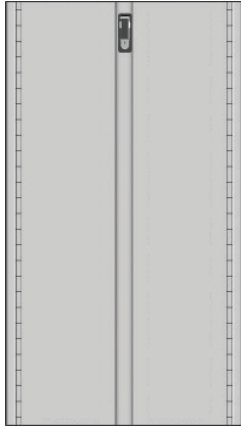

Detectives

- Authenticate at the locker
- Choose suitable compartment for deposit
- Enter item description, case number and notes
- Deposit evidence
- Notification email sent (optional)

Evidence Room Staff

- Authenticate
- View list of compartments with evidence
- Choose compartment to withdraw
- Withdraw evidence

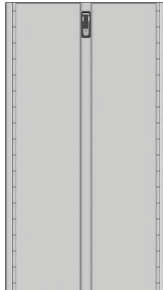

Mix & Match Compartment Sizes to Fit Your Needs

Long Gun 3-Module

7.3" x 13.4" x 52.7"

185 x 340 x 1338mm

Long Gun 2-Module

7.3" x 13.4" x 34.7"

185 x 340 x 881mm

Laptop Module

16.7" x 13.4" x 3.5"

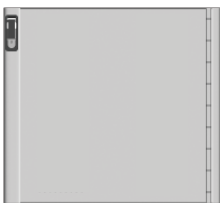

424 x 340 x 89mm

Cell Phone Module

7.3" x 13.4" x 3.5"

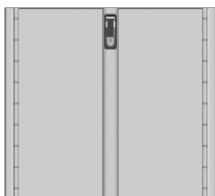

185 x 340 x 89mm

Full Size Module

16.7" x 13.4" x 16.7"

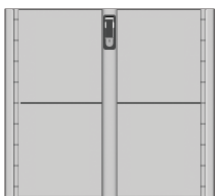

424 x 340 x 424mm

Radio Module

7.3" x 13.4" x 16.7"

185 x 340 x 424mm

Small Module

7.3" x 13.4" x 7.9"

185 x 340 x 200mm

Door Options

Steel door

Window door

5° to 40°C (40° to 104°F) operational temperature range

Refrigerated compartments

Offline mode in case of network outage

Optional Backup Battery

RTNHub Software

The RTNHub Software portal provides insight and control over your lockers and users. It lets you make instant updates and respond to alerts that you have customized. Available on authorized desktop computers and mobile devices. RTNHub software can be installed in your own IT infrastructure, or you can leverage Real Time Networks hosted cloud offering or managed services.

Features include:

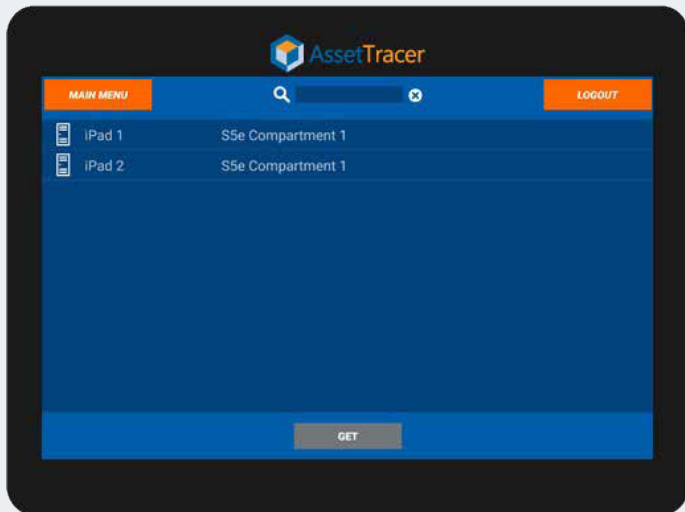

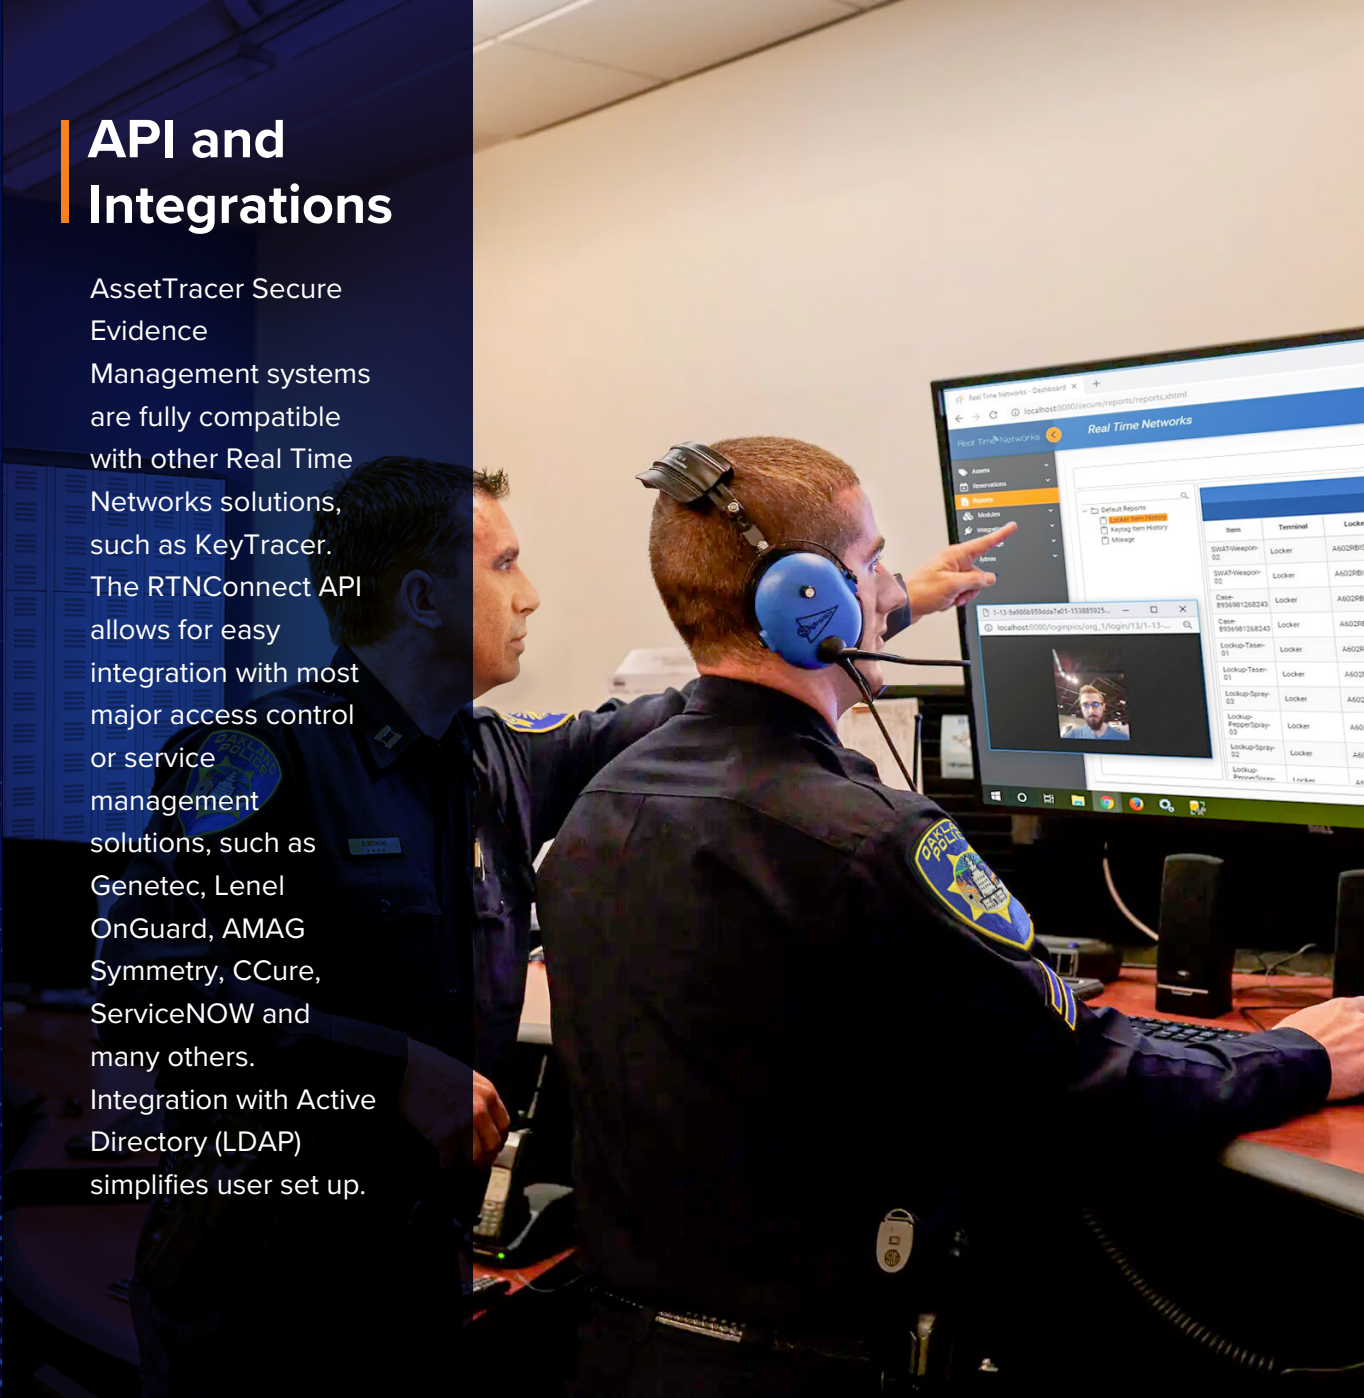

- Rapidly provision new users and modify access rights
- Browser-based application lets you manage access anywhere, anytime
- Customizable alerts and reports that can be exported to Excel, PDF, CSV or XML
- Integrates with most major access control systems

RTNConnect

API and Integrations

AssetTracer Secure Evidence Management systems are fully compatible with other Real Time Networks solutions, such as KeyTracer. The RTNConnect API allows for easy integration with most major access control or service management solutions, such as Genetec, Lenel OnGuard, AMAG Symmetry, CCure, ServiceNOW and many others. Integration with Active Directory (LDAP) simplifies user set up.

Smart Terminal

Access all of your secured equipment using the RTN Smart Terminal available with every AssetTracer Evidence Management system. Choose from multiple user authentication options, including PIN code, access control card, fingerprint or facial reader, or mobile phone. The easy-to-use touchscreen prompts users through the deposit and withdrawal process. Its intuitive menu system keeps transactions fast, secure, and simple.

Real Time Networks

AssetTracer is a premier brand of Real Time Networks. Over 4,000 of our key and asset management solutions are in use worldwide.

With operations in US, Canada, UK and Europe, Real Time Networks (RTN) is a leading provider of custom safety and security solutions – for keys, assets, and people. For over 30 years, RTN has built a reputation for delivering custom security solutions backed by industry-leading customer service and support.

From your initial consultation to custom installation, training, and 24/7 phone support, RTN keeps you and your technology running safe, secure, and efficient with sales and service available across Canada, US and UK.

Technical Specifications

Power

- 120V Power Consumption
- 5° to 50°C (40° to 120°F) operational temperature range
- Optional Backup Battery

Authentication

- PIN code
- Proximity card (compatible with most major access card systems)
- Biometric (fingerprint or facial)
- IrisID Iris Recognition Scanner
- Card & PIN

Digital

- SSL encryption in transit
- Enterprise-grade SQL Database backend
- Reader interface: RJ45 or WiFi

Lockers

- 18 gauge steel
- Optional shatter-proof clear polycarbonate doors
