

# SUPERIOR FINISHES... SUPERIOR PRODUCTS

At DeBourgh we use powder coating technology as an alternative to liquid paint finishing for all our products. Powder paint is 100% recyclable and eliminates the use of hazardous solvents and thinners. Ultimately, our powder coat finishes provide customers with a more durable, low maintenance product.

COLOR SELECTIONS

# COLOR SELECTIONS

DeBourgh's paint finishes are the highest quality in the industry. We apply 2 to 3 mil of cured thickness, more than any other manufacturer. That thicker finish equates to a more durable product for you! At DeBourgh, we deliver what we promise, products that are built to last!

Finishes :: Powder coat with 2-3 mil cured thickness

\*Due to the printing process, color swatches depicted here may be slightly different from true paint color.
